Door 3 — pane schedule

Eight panes on one double door. Four measure 900 × 500 mm and four measure 900 × 400 mm — all 900 mm high, so every design is portrait and the width is the only variable. The sizes are the client's own measurement, repeated across the the doorways; confirm each pane on site before the film is plotted.

PANE	SERVICE	GLASS H × W	ASPECT	LEAF	POSITION	PHOTO	FILE
D3-P1	ANTENATAL & POSTNATAL	900 × 500	1 : 1.80	LEFT LEAF	UPPER OUTER	PH-26	D3-P1.PDF
D3-P2	EYE SERVICES	900 × 400	1 : 2.25	LEFT LEAF	UPPER MIDDLE	PH-29	D3-P2.PDF
D3-P3	PAEDIATRICS	900 × 500	1 : 1.80	LEFT LEAF	LOWER OUTER	PH-03	D3-P3.PDF
D3-P4	MINOR SURGERY	900 × 400	1 : 2.25	LEFT LEAF	LOWER MIDDLE	PH-22	D3-P4.PDF
D3-P5	ULTRASOUND	900 × 400	1 : 2.25	RIGHT LEAF	UPPER MIDDLE	PH-25	D3-P5.PDF
D3-P6	ENT	900 × 500	1 : 1.80	RIGHT LEAF	UPPER OUTER	PH-30	D3-P6.PDF
D3-P7	INPATIENT CARE	900 × 400	1 : 2.25	RIGHT LEAF	LOWER MIDDLE	PH-31	D3-P7.PDF
D3-P8	OUR SERVICES	900 × 500	1 : 1.80	RIGHT LEAF	LOWER OUTER	GRAPHIC	D3-P8.PDF

THIS DOORWAY

- Same door, same eight panes, same measurements — but opaque film, so nothing shows through the glass.
- It leads on family, eye, ENT and ward care: antenatal & postnatal, paediatrics, eye services, ENT and the inpatient ward — services doors 1 and 2 do not show. WELCOME sits on door 2, where the client asked for it.
- Because the film is solid there is no perforation to read through, so fine detail and smaller type survive: this is the door where a photograph can be printed as a photograph.
- Opaque film also means the pane can no longer be seen through from either side. That changes how the entrance looks from inside at night — the client should be shown the night elevation before this one is ordered.

Layout as measured

Two leaves, two columns and two rows per leaf. The 400 mm panes are the ones in the middle of the doorway, against the meeting stile — so leaf A runs wide then narrow and leaf B runs narrow then wide, and the 500 mm panes finish at the two outer edges. Check that against the real leaves before the film is cut.

LEAF A — LEFT

LEAF B — RIGHT

WHY THE TWO WIDTHS MATTER

- Leaf A is the family leaf: antenatal & postnatal and paediatrics on the outer edge at full width, eye services and minor surgery against the centre stile.
- Leaf B: the ultrasound room and the ENT examination at the top, the inpatient ward in the middle, the directory bottom outer.
- Opaque vinyl, so the photograph is not interrupted by a mesh. Print it as a photograph: the file, not the film, is now the limit on detail.
- Eight panes, seven photographs and one directory — none repeated from doors 1 or 2.
- Bleed is 10 mm on every edge, so the printed piece is 920 × 520 and 920 × 420 mm.
