One banner, the sign's own setting

46 × 22 in — 1168.4 × 558.8 mm — the same measurement as the sign post panel, in the same colours and the same band arrangement: BCM on white, MEDICAL CENTRE on navy, EDDWALIRO knocked out of the red block, OPEN 24 HRS between two arrows, and the navy foot strip with the numbers and BUSSABALA. The difference is what the piece is: this one is PVC on a fence, so the artwork keeps clear of a welded hem and the eyelet line.

TO SCALE · 46 × 22 IN · WITH ITS EYELETS

WHAT IT IS

- Trim 1168.4 × 558.8 mm — 46 × 22 in, 3 ft 10 in × 1 ft 10 in. The exact file's page is that size, so it measures the banner.
- Colours are the sign's: red #ED1B24 block and open row, navy #16233F bands, white field. Nothing new was introduced for the banner.
- Artwork keeps 45 mm clear of the trim all round — the hem and the eyelet line. No type and no rule inside it.
- One face only: a banner reads from one side, and a second face is a second banner.

Where the eyelets go

Industry-typical for a fence banner at this size — confirm with the printer and the installer before the run. Nothing here is a quotation.

DIMENSIONED · HEM AND EYELETS SHOWN

- 12 eyelets at 300 mm centres around the perimeter, including all four corners; 25 mm welded hem all round.
- Fix at every eyelet. A banner this size sails in wind if it is tied at every second hole.
- Plot at 1 : 1 and never scale — the file is drawn in millimetres, and a scaled banner is a different banner.
- The red is the sign's #ED1B24: hold it to the same reference as the light box, so the fence and the board read as one set in daylight.

ITEM	VALUE
PERIMETER	3.45 M
EYELETS, THIS BANNER	12
EYES AT	300 MM CENTRES, INCL. EVERY CORNER
EYELET	12 MM OUTER, 3 MM WALL, STAINLESS OR BRASS
HEM	25 MM WELDED ALL ROUND
